2. Has proper O&M occurred during the reporting period for all PCSM BMPs? **No**

3. If **No** to #2, explain what action(s) the permittee has taken or plans to take to ensure proper O&M.

Have systematically been inspecting & working with all PCSMF owners Township-wide (excluding MS4 permit holders) to bring PCSMF's into good maintenance standing & to maintain the same going forward. Code enforcement is applied as required to reach good PCMF O&M, per the Township's Stormwater Management Ordinance. The owners with facilities in good O&M status are integrated into an annual self-inspection reporting program.

(If you are relying on PA's statewide program for stormwater associated with construction activities, you may skip to MCM #6, otherwise complete all questions for BMPs #4 - #6 in this section.)

BMP #4: Require the implementation of a combination of structural and/or non-structural BMPs that are appropriate to the local community, that minimize water quality impacts, and that are designed to maintain pre-development runoff conditions.

1. Specify the number of PCSM Plans reviewed during the reporting period for projects disturbing greater than or equal to one acre (including projects less than one acre that are part of a larger common plan of development or sale).

Not Applicable

2. Has a tracking system been established and maintained to record qualifying projects and their associated BMPs? **Not Applicable**

BMP #5: Ensure that controls are installed that shall prevent or minimize water quality impacts. The permittee shall inspect all qualifying development or redevelopment projects during the construction phase to ensure proper installation of the approved structural PCSM BMPs. A tracking system (e.g., database, spreadsheet, or written list) shall be implemented to track the inspections conducted and to track the results of the inspections (e.g., BMPs were, or were not, installed properly).

1. During the reporting period have you inspected all qualifying development and redevelopment projects during the construction phase to ensure proper installation of approved structural BMPs? **Not Applicable**

2. Has a tracking system been established and maintained to record results of inspections? **Not Applicable**

BMP #6: Develop a written procedure that describes how the permittee shall address all required components of this MCM.

Have you developed a written plan that addresses: 1) minimum requirements for use of structural and/or non-structural BMPs in plans for development and redevelopment; 2) criteria for selecting and standards for sizing stormwater BMPs; and 3) implementation of an inspection program to ensure that BMPs are properly installed? **Not Applicable**

MCM #6 – Pollution Prevention / Good Housekeeping Module 

BMP #1: Identify and document all operations that are owned or operated by the permittee and have the potential for generating pollution in stormwater runoff to the MS4. This includes activities conducted by contractors for the permittee.

1. Have you identified all facilities and activities owned and operated by the permittee that have the potential to generate stormwater runoff into the MS4? Yes

2. When was the inventory last reviewed? 02/14/2025

3. When was it last updated? 02/25/2025

BMP #2: Develop, implement and maintain a written O&M program for all operations that could contribute to the discharge of pollutants from the MS4, as identified under BMP #1. This program shall address stormwater collection or conveyance systems within the regulated MS4.

1. Have you developed a written O&M program for the operations identified in BMP #1? Yes

2. Date of last review or update to written O&M program: 03/11/2025

BMP #3: Develop and implement an employee training program that addresses appropriate topics to further the goal of preventing or reducing the discharge of pollutants from operations to the regulated small MS4. All relevant employees and contractors shall receive training.

1. Have you developed an employee training program? Yes

2. Date of last review or update to training program: 06/24/2025

Date of latest training: 07/31/2025

3. Training topics covered:

MS4 program, SWMP, pollution prevention, IDD&E, source tracing, facilities & site assessment, operations and maintenance, overflow response, storm sewer maintenance, MCM 1-6 implementation, inlet and line cleaning, SOP reviews and updates, good housekeeping, and program outreach and education.

4. Name(s) of training presenter(s):

Charles Hayes- ELT Stormwater Coordinator, Luke Trainor-Abel Recon, the Local Technical Assistance Program with PA Dept. of Transportation, Benjamin Herskowitz- Chief: Hazmat 2 Environmental Fire Rescue, and Tyler White, Brian Gerlach for O&M flushing for PW's.

5. Names of training attendees:

All public works staff, Township office administrative staff, the Township police (patrol) officers, and our local fire companies.

MCM #6 Comments:

Expand and update the annual Training plan as additional training opportunities arise, and or new staff require extra training.

• If **Yes** to #4, did you comply with the public participation requirements of the applicable appendix? **Yes**

• If **Yes** to #4, describe the plan modifications.

The PRP was revised to add new project opportunities since the original PRP list was fully exhausted to implement those projects that were both feasible and or approved by DEP. Additional projects included new sites for sediment/pollution reduction following outreach and negotiations with several private landowners. Another project included the I2 Capital Sediment Reduction project which required extensive coordination with DEP.

5. Summary of progress achieved during reporting period.

Performed storm drain cleaning with lab sample testing/weighing per protocol. Surveyed and conceptually designed streambank project at 2198 Hobson Road while beginning the negotiations. Received approval of our revised PRP in June with the final reduction values for the I2 Capital project added and the pending streambank projects added. Completed the negotiations, agreements, survey/design/permitting, and project funding for the pending installation of the streambank project at 93 Strasburg Pike (construction begins in October of 2025).

6. Anticipated activities for next reporting period.

Complete the installation and reporting of the pending streambank project at 93 Strasburg Pike with the construction beginning in October 2025. The sediment reduction is 73,025 lbs. Complete project negotiations and begin implementation of a streambank

project at 2198 Hobson Road with proposed sediment reduction of 76,000 lbs.
