

EAST LAMPETER TOWNSHIP

Non-Residential & Multi-Family Residential Building Permit

Procedure for Applicants to Obtain a Building/Zoning Permit will be as follows:

1. The applicant for a Non-Residential or Multi-Family Building Permit or their selected agent will choose and contact one of the authorized Review and Inspection Agencies to contract for plan review and construction services. Once an Inspection Agency has been selected and a plan review is performed for a Building Permit, the Agency will perform all inspections associated with the permit. If the development has a name, the name must appear on the Building Permit Application.
2. The applicant or selected agent will complete the East Lampeter Township Application for Non-Residential and Multi-Family Zoning Permit and the UCC Application for Building Permit provided by East Lampeter Township. The completed applications, construction plans, and any other required documents and specifications for plan review will be submitted to the selected Agency. East Lampeter Township requires three (3) complete sets of approved plans and related documents for processing of the permit.
3. Upon completion of the plan review process, the following list of documents following shall be submitted to the Building Code Officer (BCO) at East Lampeter Township for the final processing of the Zoning/Building Permit and issuance of the Permit to the applicant: three (3) complete sets of plans along with any accompanying documents and specifications, the completed East Lampeter Township Application for Non-Residential and Multi-Family Zoning Permit, the UCC Application for Building Permit, complete list of required inspections including the Inspector's name and phone number, and the Certificate of Workers Compensation with East Lampeter Township listed as a certificate holder. No inspections shall be performed until the Township has released the Building/Zoning Permit without prior approval of the BCO.
4. All plan review and inspection fees are to be set and collected by the Inspection Agency. When the application for a permit is submitted to the Township, East Lampeter Township will collect its own zoning, code administration, and L&I Educational fees separately. The Township will not collect or pay out fees for plan reviews and inspections. No fees to the Township are required with the application.
5. Initially, only a Footer & Foundation Deferred Permit will be issued for projects involving new building construction or building addition. A Full Building Permit will be issued only after receipt of a certification from a Professional Land Surveyor registered with the Commonwealth of Pennsylvania stating the following: Footer and Foundation of the building are within approved building envelope and is clear of any utility, storm water management, or sanitary sewer easements; elevations of the footer, foundation and first floor elevation are within the parameters of the approved Storm Water Manager Plan; the Footer, foundation and first floor elevations are located in compliance with the approved Land Development Plan for the project; the Proposed building is a the location shown on the approved Final Plan for the project; the Storm Water Management berm, outlet structure, and emergency spillway have been constructed per approved Storm Water Management Plan, all subject to review, verification, and approval by appropriate Township staff.
6. The Certificate of Use and Occupancy will be issued by East Lampeter Township. The BCO must be notified prior to final inspection of a project to coordinate such final inspection. The BCO must inspect the project prior to issuing a Certificate of Occupancy. A Certificate of Use & Occupancy will be issued by East Lampeter Township upon successful inspection and after receiving a list of completed inspections signed by the performing inspector.

Applicant's Certification:

As the owner or the authorized agent of the project for which this application is filed, I certify that:

1. The description of use, estimated construction cost and all other information provided as part of this application for a building permit is correct.
2. The building or structure described in this application will not be occupied until all known code violations are corrected and a Certificate of Occupancy has been received from the Department of Labor and Industry.
3. This project will be constructed in accordance with the approved drawings and specifications (including any required non-design changes) and the Uniform Construction Code standards as specified in 34 PA Code Chapters 401-405.
4. Any changes to the approved documents will be filed with the Department of Labor & Industry.
5. If the licensed architect or engineer in responsible charge of this construction should change, written notice of the change will be provided to the Department of Labor and Industry.
6. No error or omission in either the drawings and specifications or application, whether approved or not, shall permit or relieve me from constructing the work in any manner other than provided for in 34 PA Code Chapters 401-405.
7. If signed by someone other than the construction owner, this work has been authorized by the owner of record and I have been authorized by the owner to complete this application on his behalf. I will be acting on behalf of the owner as:

AN ORDINANCE PROVIDING FOR THE INSTALLATION OF LISTED RAPID
ENTRY KEY BOXES, HAZARDOUS MATERIALS CABINETS, KEY SWITCHES,
SECURITY PADLOCKS, AND FIRE SPRINKLER SECURITY CONNECTION
CAPS FOR USE BY THE FIRE DEPARTMENT TO GAIN ACCESS TO A
STRUCTURE

Background:

Many buildings, particularly buildings other than one and two-family dwellings, are equipped with automatic alarm systems and/or sprinkler standpipe system. Such automatic systems may cause the fire companies of East Lampeter Township or neighboring townships to be summoned at a time when the building is not occupied or when the occupant of the building is not available to provide entry for the Fire Department. The Township wishes to prevent damage from forceful entry to such structures and to provide swift entry into such structures by the Fire Department. The standard model fire code provides that any Fire Department may require certain occupancies to maintain a rapid access or rapid entry system as prescribed by the Fire Department. The East Lampeter Township Board of Supervisors finds the need to establish such a rapid entry system for the township and for any areas covered by the Hand-in-Hand, Lafayette, Ronks, Witmer, Paradise-Leaman Place, Eden, Lampeter, and Gordonville Fire Companies.

NOW THEREFORE, be it enacted and ordained as follows:

Section 1. Definitions

FIRE OFFICIAL: The Fire Chief or his designee

FIRE DISTRICT: The normal fire protection district located within East Lampeter Township covered by Hand-in-Hand, Lafayette, Ronks, Witmer, Paradise-Leaman Place, Eden, Lampeter or Gordonville Fire Companies.

RESPONSIBLE PARTY: The person or persons charged with the responsibility for the occupancy of a building or the owner of a business which is the occupant of such building.

KEY BOX: A UL Listed box, size and style, approved by the Fire Official that meets the requirements and uses the same security key code adopted by the Fire Department.

KEY SWITCH: A switch that allows a person with a key (but no one else) to override an electronic system. A key switch can also control the emergency power shutoff system allowing for access by the Fire Department.

SECURITY PADLOCK: A padlock approved by the Fire Official that utilizes the approved key code utilized by the Fire Department.

SECURITY CAP: A Fire Department Connection (FDC) Plug and Cap approved for use in East Lampeter Township by the Fire Official.

Section 2. Application of Ordinance:

A) MANDATORY KEY BOXES FOR FIRE SUPPRESSION AND STANDPIPE SYSTEMS

When a building within the Fire District is protected by an automatic fire suppression and/or standpipe system, it shall be equipped with a Key Box, installed at a location approved by the Fire Official.

B) MANDATORY KEY BOXES FOR AUTOMATIC ALARM SYSTEMS

When a building is protected by an automatic alarm system and/or access to or within a building, or an area within that building, is unduly difficult because of secured openings, and where immediate access is necessary for life saving or firefighting purposes, it shall be equipped with a Key Box, to be installed at a location approved by the Fire Official.

C) MANDATORY KEY BOXES FOR MONITORED ALARM SYSTEMS, SPRINKLER SYSTEMS, OR AUDIBLE ON SITE ALARMS

When an existing building is protected by a monitored alarm system, a sprinkler system, and/or an audible on site alarm, it shall be equipped with a Key Box, to be installed a location approved by the Fire Official within six (6) months of being notified by the Township of the requirements of the Ordinance.

D) KEY BOX STANDARD

The Key Box shall be a Knox-Box as approved and agreed upon by the Fire Official and the building owner.

E) MANDATORY STORAGE CABINET

In buildings storing or dispensing Hazardous Materials, a Hazardous Materials Cabinet may be required to store Material Safety Data Sheets and other information as required by the Fire Official.

F) AUTOMATIC GATES

When a property is accessed through a gate or cross arm that impedes ingress through required Fire Lanes by means of a key or swipe card, it shall be equipped with a Key Switch to be installed at a location approved by the Fire Official.

G) SECURITY PADLOCK

When requested by the Fire Official, a property that is protected by a locked fence or gate and where immediate access to the property is necessary for life saving and firefighting purposes, it shall be equipped with a Security Padlock to be installed at a location approved by the Fire Official. It shall then be the responsibility of the Responsible Party to see that the fence or gate is secured properly so that the Security Padlock is accessible.

H) CONSTRUCTION SITES

When requested by the Fire Official, a construction site that is to be secured by a locked fence or gate, such site shall be subject to the same requirements as properties protected by Security Padlocks during the duration of construction or until the fence or gate is removed. The Security Padlock will be obtained by placing a security deposit with the first due covering fire company in an amount set to cover replacement of Security Padlock should it be lost or damaged. Once the deposit has been made, a Fire Official will come to the construction site and explain the use of the Security Padlock. It shall then be the responsibility of the construction company to see that the fence or gate is secured properly so that the Security Padlock is accessible.

I) SECURITY OF FIRE DEPARTMENT CONNECTIONS

When a building is protected by an automatic sprinkler and/or standpipe system and the fire department connection is exposed to vandalism, the Fire Official may require that a Security Cap be installed.

J) NON-APPLICABILITY TO ONE AND TWO-FAMILY DWELLINGS

The requirements of this ordinance are not applicable to one and two-family dwellings. However, the occupants of one and two-family dwellings are encouraged to participate voluntarily by using a Residential Security Box.

K) KEY BOX SPECIFICATIONS

The Key Boxes shall be located and shall contain, but not be limited to the following items as designated by the Fire Official.

- a. Labeled Keys or Key Cards to locked points of egress, whether in interior or exterior of such buildings.
- b. Labeled Keys or Key Cards that are current.
- c. Labeled Keys or Key Cards to the locked mechanical rooms.
- d. Labeled Keys or Key Cards to any fence or secured areas not covered by the provisions for Automatic Gates, Security Padlocks, and Construction Sites (see Section 2 E, F, and G above).
- e. Labeled Keys or Key Cards to any other areas that may be required by the Fire Official.
- f. A card containing the emergency contact people and phone numbers for each occupancy.
- g. Floor plans of the rooms within the building may also be required, showing locations of shut offs.
- h. The Material Safety Data Sheets for all Hazardous Materials, as required.
- i. The key box shall be installed at a location agreed upon by the Fire Official.
- j. The key box may have an optional tamper switch, wired on a separate zone, that will activate a trouble alarm if anyone tampers with the box.

- k. The installation of the key box shall be made in accordance with the manufacturer's recommendation in addition to the approval of the Fire Official.
- L) ALERT DECALS
Alert Decals, approved by the Fire Official, to alert fire companies of the presence of security features covered by this ordinance, will be displayed on any outside doors or windows as designated by the Fire Official.
- M) SHARING OF KEYS
Township based fire companies Hand-in-Hand, Lafayette, Ronks, Witmer, Paradise-Leaman Place, Eden, Lampeter, and Gordonville Fire Companies are allowed to share the Key Box keys for their service area with other Township based fire companies.
- N) RETURN OF KEYS CURRENTLY BEING HELD
After four (4) months following passage of this ordinance, all keys currently in possession of the Fire Department will be returned to the Responsible Party.
- O) BUILDING PERMITS
Compliance with this ordinance shall be a condition precedent to obtaining a building permit for all buildings for which building permits have not been received as of the effective date of this ordinance and for receiving Certificates of Occupancy for all buildings for which Certificates of Occupancy have not been received before the effective date of this ordinance. The requirements of this ordinance, other than these requirements concerning building permits and certificates of occupancy, shall be applicable for all other buildings for which occupancy permits have been received prior to the effective date of this ordinance.
- P) VIOLATIONS
Every violation of this ordinance shall constitute a summary offense which may be enforced by action brought before a District Justice under the Pennsylvania Rules of Criminal Procedure. Conviction of violation shall include a criminal fine not to exceed One Thousand and 00/100 (\$1,000.00) Dollars per violation. Each day that a violation exists or is permitted to continue to exist shall constitute a separate offense. In addition to summary criminal enforcement, the provisions of this ordinance may be enforced by the Township through an action in equity brought in the Court of Common Pleas of Lancaster County. All fines and penalties collected for the violation of the ordinance shall be paid to the Township Treasurer.

Section 3. Provisions Severable:

The provisions of this ordinance are severable. If any portion of this ordinance is deemed by a court of competent jurisdiction to be invalid or unenforceable, it is the stated intent of the Board of Supervisors that the remaining provisions would have been adopted.

Section 4. Effect of this Ordinance on Other Ordinances:

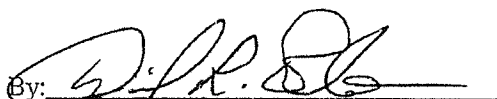

This ordinance is to be read as complementary with and not in substitution of or as a modification of other Township ordinances addressing fire safety requirements and is further intended to be read as consistent with and complementary with the requirements of the Uniform Construction Code as implemented by East Lampeter Township.

Section 5. Effective Date of Ordinance:

This ordinance shall become effective five (5) days after the date of its enactment.

Duly ordained and enacted by the Supervisors of the Township of East Lampeter, Lancaster County, Pennsylvania, this 17th day of September, 2008.

BOARD OF SUPERVISORS OF
EAST LAMPETER TOWNSHIP

By: 
(Vice) Chairman

Special Inspections and Observation Statement

Municipal Permit # _____
Date: _____

This statement must accompany permit applications for all construction for which special inspections and observations are required in Chapter 17 of the <i>International Building Code (IBC)</i> .		
Project Name:		
Project Address:		
Owner:		Telephone:
e-mail:		

This is to certify that all the inspections and observations that I have checked on pages 2-3 **and** on page 4 of this statement are required for the project named above and will be performed by the designated individuals or firms. By signing this statement, I also acknowledge that:

- These inspections and observations must be performed by competent individuals in accordance with the requirements of the *IBC* Chapter 17 (as applicable) and that the construction work must comply with the department-approved plans and specifications and all applicable provisions of the Uniform Construction Code;
- Records of all required special inspections and testing observations (including any discrepancies and methods of correction of these discrepancies) will be retained and made available to department representatives, upon request; and,
- The Final Report section of this statement must be signed by me and a copy of this statement submitted to the department inspector at the time that the final inspection is performed and before a certificate of occupancy is issued.

<input type="checkbox"/>	4. Verify use of proper materials, densities and lift thicknesses during placement and compaction of compacted fill.	X	—
<input type="checkbox"/>	5. Prior to placement of compacted fill, observe subgrade and verify that site has been prepared properly.	—	X

Don't Let Storm Water Run Off With Your Time and Money!

What the Construction Industry Should Know About Storm Water In Our Community

The construction industry plays an important role in improving our community's quality of life by not only providing new development, but also protecting our streams and rivers through smart business practices that prevent pollution from leaving construction sites.

Storm water runoff leaving construction sites can carry pollutants such as dirt, construction debris, oil, and paint off-site and into storm drains. In our community, storm drains carry storm water runoff directly to local creeks, streams, and rivers with no treatment. Developers, contractors, and homebuilders can help to prevent storm water pollution by taking the following steps:

1. Comply with storm water permit requirements.
2. Practice erosion control and pollution prevention practices to keep construction sites "clean."
3. Conduct advanced planning and training to ensure proper implementation on-site.

The remainder of this fact sheet addresses these three steps.

Storm Water Permit Requirements for Construction Activity

Planning and permitting requirements exist for construction activities. These requirements are intended to minimize storm water pollutants leaving construction sites.

- Pennsylvania's Erosion and Sediment Pollution Control Program (25 Pa. Code, Chapter 102) requires Erosion and Sediment Control Plans for all earth disturbing activities.
- The National Pollutant Discharge Elimination System (NPDES) Permit Program (25 Pa. Code, Chapter 92) requires that construction activities disturbing greater than one acre submit a Notice of Intent for coverage under a general NPDES permit.

Knowing your requirements before starting a project and following them during construction can save you time and money, and demonstrate that you are a partner in improving our community's quality of life. For more information about these programs, contact your local county conservation district office or the Department of Environmental Protection.

Erosion Control Practices:

- Perimeter controls (e.g. silt fence)
- Sediment traps
- Immediate revegetation
- Phased, minimized grading
- Construction entrance
- Protection of streams and drainage ways
- Inlet protection

An Ounce of Prevention

Rain that falls onto construction sites is likely to carry away soil particles and other toxic chemicals present on construction sites (oil, grease, hazardous wastes, fuel). Storm water, if not properly managed, carries these pollutants to streams, rivers, and lakes. Erosion and sediment control practices can serve as a first line of defense,

Pollution Prevention Practices:

- Designated fueling and vehicle maintenance area away from streams.
- Remove trash and litter.
- Clean up leaks immediately.
- Never wash down dirty pavement.
- Place dumpsters under cover.
- Dispose of all wastes properly.

minimizing clean up and maintenance costs, and the impacts to water resources caused by soil erosion during active construction. Erosion controls can reduce the volume of soil going into a sediment control device, such as a sediment trap, therefore, "clean out" frequencies are lower and maintenance costs are less. When possible, divert water around the construction site using berms or drainage ditches.

In addition, use pollution prevention and "good housekeeping measures" to reduce the pollution leaving construction sites as well. This can be as simple as minimizing the pollution source's contact with rainwater by covering it, maintaining a "clean site" by reducing trash and waste, and keeping vehicles well maintained.

The Best Laid Plans

Plans such as erosion and sediment control plans and storm water pollution prevention plans are important tools for outlining the erosion control and pollution prevention practices that you will use to manage storm water runoff prior to breaking ground. Developing good plans allows for proper budgeting and planning for the life of the project. Proper installation and maintenance of erosion and storm water controls is essential to a plan that works. Training for on-site staff helps to ensure the proper installation and maintenance of erosion controls and pollution prevention practices. Inspect controls and management techniques regularly to ensure they are working, especially after storm events. If polluted storm water is leaving the site, you may need to repair or add additional storm water controls.

The Bigger Storm Water Picture

Your community is preventing storm water pollution through a comprehensive storm water management program. This program addresses storm water pollution from construction, but it also deals with new development, illegal dumping to the storm sewer system, and municipal operations. It will also continue to educate the community and get everyone involved in making sure the only thing that storm water contributes to our streams is . . . water! Contact your community or the Pennsylvania Department of Environmental Protection for more information about storm water management.
